F SERIES

**RF LIBRARY
SECURITY
SYSTEM**

d-techinternational.com

D-Tech's secureIT™ F-Series antenna system provides perimeter based protection and improves alarm handling capabilities for libraries where high cost antenna systems are not appropriate or where cost effective solutions are required.

Designed with a durable metal frame with simple and modern styling, the F-Series system provides a budget friendly deterrent.

FEATURES

- Compatible with 10.5/10.0/9.5/8.5 MHz RF labels and items tagged with approved labels from book suppliers
- D-Tech's advanced digital RF technology uses state of the art, digitally enhanced receiver to chip technology to ensure superior detection
- Integrated alarm lights and sounder
- Mounts as a free standing unit or on a standard ramp
- Alarm output to recording equipment and/or voice alarms available
- Optional custom colours
- Optional integrated people counter
