

countIT LIVE™

REAL TIME
OCCUPANCY
MONITORING
& ALERTING

YOUR LIBRARY, YOUR CHOICE

countIT LIVE™ is a real time occupancy monitoring and alert solution to ensure safe entrance to any facility. Simple to self-install, countIT LIVE™ is fully operational within 30 minutes of opening the box and its privacy-protecting 99.5% accuracy is unrivalled. Accessible on any WiFi enabled device and suitable for buildings with multiple entrances, countIT LIVE's advanced functionality allows for dwell time monitoring and can even detect staff to exclude from occupancy data.

KEY FEATURES

- Real time occupancy monitoring solution which delivers visual warnings at entrances
- Accuracy exceeds 99.5% – unrivalled sensor precision is unaffected by environmental conditions
- Advanced functionality delivers staff detection and dwell time monitoring capabilities
- Fast, simple self-install process – from box to fully-operational in 30 minutes
- Multi-unit capability makes countIT LIVE a solution for multiple and large entrances
- Privacy retaining – anonymous sensor technology uses no cameras or video and collects no personal information
- Accessible on any WiFi enabled device
- Simple customer dashboard delivers clear, timestamped Safe To Enter/Do Not Enter message including traffic light colour indicator
- Attendant dashboard includes key, real time occupancy data
- Reduced error build up delivers higher data integrity in historic reporting function for analysis and audit purposes
- A standalone solution, separate from existing IT networks
- Remote management and reporting available through cloud platform option

SPECIFICATIONS

Physical size: Counter

Height 55mm
