KABIS™ | Lite

THE KIRTAS DIFFERENCE

The page images are captured using the latest Canon 24mp camera in full 36 bit color internally and 24 bit color external in a fraction of a second. The images are captured at 300ppi resolution with superior sharpness and excellent color fidelity with dual LEDs.

The new LIMB™ image processing software includes more automated features for faster, accurate image processing with minimal intervention. When coupled with the OCR processing software, automated “image tagging” is possible creating valuable book structural metadata, and searchable PDFs.

QUALITY BOOK DIGITIZATION

Quality results are the primary objective of any book digitization project. Quality includes superior images, high accuracy OCR, comprehensive metadata, and complete book integrity. Achieving this will allow you to use the book images to their fullest capability both now and for your future needs. Do it once so they last forever!

The KABIS I Lite system continues the Kirtas tradition by providing the SmartCradle™ with the new automatic book centering feature that increases post-processing productivity.

The 110 degree position is optimal for low stress, gentle book positioning and is ideal for fragile and rare books. Air flows are used to separate pages, and the latest SureTurn robotic arm and vacuum head will gently lift and turn the page. The result is full book content integrity and quality.

The KABIS Manager Plus software provides a simple user interface so digitizing begins quickly. It is easy to learn and set up is quick for each book. All of the KABIS controls are integrated and the interface provides easy monitoring of page capture, quality control and management for accuracy.
